Response to Arguments

Applicant's arguments see filed response filed 2/11/05, with respect to the rejection(s) of the pending claim(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is being made as follows.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 7, 9, 18, 20, 43, 45-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "high polymer organic substance" in claims 1-4, 7, 9, 18, 20, 43, 45-48 is a relative term, which renders the claim indefinite. The term "high polymer organic substance" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear if the term "high polymer organic substance" is referring to the carbon content, a high boiling temperature, high sintering temperature, or a high thermal decomposition temperature of the "high polymer organic substance." Furthermore, it is unclear what is considered as "high".

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The non-patent literature is being cited to show the state of the art.
